

The Stoess "D" Series hitches are designed to pull John Deere HZ, LZ, and LL 8-foot drills.

The 4-unit, 5-unit, and 6-unit models have detachable tongues to shorten transport width.

The 7-unit and 8-unit models are available with both detachable and non-detachable tongues for transport.

A hub and wheel which supports the hitch during transport is included with the 7-unit and 8-unit models when ordered with detachable tongues.

4, 5, 6, 7, and 8 unit models available
