

The Stoess "J" Series is a family of field tested, rugged, yet economical hitches designed to pull center drive rod weeders, drills, harrows, and more.

"Crabbing" on hills is minimized with a short tongue-to-width ratio.

The "J" Series hitches have also been adapted into ground sprayers.

Standard Features:

- Primarily constructed from 2-1/2" square steel tubing
- Detachable spindle & hub assemblies with 2200 lb ratings.
- 15x5 wheels

Optional Features:

- Pull brackets for center drive rod weeders
- Pull brackets for Case 150, 6200, and 7100 drills
- Caster brackets for outside wheels on 5-section hitches
- Custom pull brackets on request
- 760 x 15 8-ply rib implement tires
